

TK-REVITALIZER 12

Curing and Sealing Compound Rejuvenator

Item No. TK-12

PRODUCT DESCRIPTION

TK-REVITALIZER 12 is a rejuvenator for old and weathered concrete surfaces. TK-REVITALIZER 12 revives aging curing/sealing compounds and restores them to their original aesthetic. What results are fresh, invigorated concrete surfaces with resiliency and longevity to withstand long-term use.

Features:

- Cleanses and refreshes curing and sealing compounds for concrete surfaces with longer life and less need for maintenance.
- Immediate results with no need for stripping old sealers or applying additional sealer (in most cases).
- Easy spray and back roll application.
- For use in place of xylene and other harsh solvents.

USES:

Suitable for interior or exterior use on existing concrete surfaces that have previously been treated with a curing and sealing compound.

APPLICATION PROCEDURES

PREPARATION:

The surface should be pressure washed to ensure that dirt will not contaminate the material during the wash process. Let dry overnight.

APPLICATION:

TK-REVITALIZER 12 should be sprayed and back rolled until there is no moving liquid or “cobwebbing” (stringing on the roller from the sealer beginning to resolidify).

CLEAN UP:

Use TK-00 XYLENE* to clean tools and equipment. Dispose of rags in accordance with all applicable regulations.

COVERAGE:

TK-REVITALIZER 12 should be applied at a rate of 150-200 square feet per gallon, or enough so that the surface is completely flooded with product. Coverage rates are provided as a guideline only. Many factors including surface texture, porosity and weather conditions will determine actual coverage rates.

MAINTENANCE:

Occasional washing with water is recommended. In some cases, a small amount of ammonia (mixed 10-parts water: 1-part ammonia) will help keep the area cleaner.

LIMITATIONS:

- TK-REVITALIZER 12 will typically restore existing concrete sealer to its “new” condition, however in some cases the sealer will need to be removed and replaced altogether.

FIRST AID:

- Consult this product’s safety data sheet for additional health and safety information. Safety Data Sheets are available through TK distributors, the TK office and the TK website.

AVAILABILITY:

TK-REVITALIZER 12 is available through TK Distributors. Contact TK Products for the nearest distributor. Packaged in 55-gallon drums, 5-gallon pails and 1-gallon cans.

TECHNICAL DATA

Composition and Materials: A blend of aromatic solvents, UV protection additives and film refreshers.

Color:	Clear
Flash Point:	> 100°F
